

CASE STUDY

Procter & Gamble

How Nulogy's agile platform helped P&G standardize operations and increase productivity

EXECUTIVE SUMMARY:

P&G used Nulogy's Agile Customization Platform to standardize operations across multiple sites, gain visibility into supply chain issues and drive big increases in productivity, accuracy and batch record efficiency.

INTEGRATION:

The Nulogy platform is integrated with SAP and RTCIS (WMS).

Who is P&G?

P&G is a consumer products company, founded in 1837, that supports fabric and home care, baby, feminine and family care, as well as beauty, health and grooming categories.

P&G went live with Nulogy for its first site in 2017. Since then, P&G has implemented PackManager at more than a dozen sites, standardizing operations and driving consistent work processes.

The Challenge:

P&G had to find a way to improve service levels and reduce high labor costs caused by inefficient work processes. They also needed to find a way to standardize processes and performance across multiple contract packaging facilities. On the macro level, P&G lacked the agility to effectively identify contract packaging bottlenecks and repeat issues in its supply chain.

P&G also had the unanticipated challenge of adopting a technological solution at a new contract packaging facility where many employees had not worked in a warehouse facility and also lacked experience using a SaaS solution like PackManager.

What I appreciate about PackManager is that it's really intuitive. You don't feel like you have to have a computer science degree to figure it out.

BRYANNA LAND, DAYTON MIXING CENTER PROCESS ENGINEERING, P&G

The Need

P&G needed an agile contract packaging software solution that would:

- Standardize operations with a strong platform for driving consistent work processes;
- Integrate with existing SAP and RTCIS systems to enable access to and sharing of real-time data;
- Improve order productivity while reducing process errors; and
- Increase agility by empowering timely, responsive and informed decision-making.

The Results

Significant benefits P&G has seen since adopting Nulogy's solutions include:

- Performance and efficiency tracking in PackManager to share real-time performance data with all production team members
- Agile decision-making with quicker access to data and the ability to better share, learn and re-apply across P&G's six additional distribution sites
- Operational efficiencies from access to improved data visualization

PackManager and QCloud are different from the other systems and solutions on the market in that they offer a modern user interface, improved material resource planning capabilities and a streamlined process for startup.

STEPHEN NECAMP
MSO OPERATIONAL EFFICIENCY
LEADER, P&G

IN A LITTLE MORE THAN A YEAR SINCE PARTNERING WITH NULOGY, P&G HAS SEEN SIGNIFICANT RESULTS:

60%

increase in receive order productivity

40%

increase in receive order accuracy

40%

Increase in batch record efficiency
